INTRODUCTION

Following is a list of publications of the Montana Department of Natural Resources and Conservation. Publications are listed in three sections: general publications, environmental impact statements, and water resources surveys.

The list includes only those publications released since 1973, except for the Montana Water Resources Surveys, which were published over a period of thirty years before that date. Copies of some publications may be obtained by writing to the Department; others are available only at public libraries or through interlibrary loan.

To order publications, ask for them by title and year of publication (see enclosed order form). At present the Department does not charge for any publications except for the Montana Water Resources Surveys, some of which are available at \$5.00 each.
